Derabassi, Punjab

Software Developer

Software Developer with 3 years of experience in web and application development using HTML, CSS, JavaScript, React.js, PHP, Symfony, CodeIgniter and Laravel. Skilled in working with databases, APIs, and cross-functional teams. Currently pursuing an MBA in Cybersecurity to strengthen expertise in secure software development.

Experience

Software Developer

Click Design Solution • Zirkapur

05/2026 - Present

- Building a multi-tenant application with separate databases per tenant in Laravel requires a robust strategy for dynamic database connection switching, isolated routing, and tenant-aware migrations

Software Developer (Full-Time)

Code Brigade/SchoolPad Technologies • Mohali, Punjab

07/2024 - 04/2026

- Transitioned from intern to full-time role based on performance and technical contributions.
- Contributed to multiple projects using HTML, CSS, JavaScript, React.js, PHP.
- Implemented responsive design, optimized site performance, and managed backend integrations.

Software Developer Intern

Code Brigade • Mohali, Punjab

06/2023 - 06/2024

- Worked on real-time web development projects, gaining hands-on experience in full-stack development, worked on bug fixing and UI improvements.
 - Learned project lifecycle management and improved coding best practices.
-

Professional Projects

1. Alumni & Institution Data Management Portal (Symfony):

- Developed and maintained a web portal to manage alumni and educational institution data.
- Built features for data entry, reporting, and user authentication using React.js, PHP, and MySQL.
- Improved usability and performance by optimizing front-end components and backend queries.
- Contributed to a cleaner UI and better data flow through active team collaboration.

2. School Management System(CodeIgniter):

- Worked on core modules of a full-fledged school management system used by 300+ educational institutions.
- Implemented pre-admission workflows, including enquiry forms and student admission management.
- Developed and optimized the Dashboard Module, providing real-time insights such as student statistics, admission trends.
- Built and enhanced features in the Examinations Module, including reports, result processing, and performance analytics.
- Integrated APIs and databases to automate report generation and enhance overall data accuracy.
- Focused on secure coding practices and ensuring a smooth user experience for admins, teachers, parents and students.

3. Warehouse Management System (Laravel):

- Developed a multi-tenant Warehouse Management System using Laravel, PHP, MySQL, JavaScript, AJAX, and Bootstrap to streamline warehouse operations for multiple clients.
 - The application included inventory management, order processing, warehouse allocation, staff management, and role-based access control, ensuring that users could access only the warehouses and resources assigned to them.
-

Technical Skills

- Frontend: HTML, CSS, JavaScript, AJAX, React.js
 - Backend: PHP
 - Framework: Symfony, CodeIgniter, Laravel
 - Database: MySQL
 - AI Tools & Productivity: ChatGPT, GitHub Copilot, Codex, Antigravity.
 - Tools & Others: Git, GitHub, GitHub Desktop, Postman, VS Code, FileZilla.
-

Education

MBA

Chitkara University • Rajpura, Mohali

08/2026

Online MBA in Cyber Security

B.Tech (Computer Science Engineering)

Chitkara University • Rajpura, Punjab

08/2024

CGPA: 9.46

Grade: 12th

Mount Carmel School • Chandigarh

03/2020

Percentage: 84%

Personal Project

JobDock – Job Portal

Tech Stack: Laravel, PHP, MySQL, Bootstrap, JavaScript, AJAX

Developed a full-stack job portal that enables employers to post job openings and job seekers to search and apply for jobs. Implemented user authentication, role-based access, job management, company profiles, application tracking, and responsive user interfaces while following Laravel best practices.

Designed the backend architecture using Laravel's MVC pattern and Eloquent ORM, integrated MySQL for efficient data management, and optimized application performance through clean code practices. The project demonstrates end-to-end web application development, including CRUD operations, authentication, validation, and database relationships.

Live Demo: <https://jobdock.org/>

Certifications

- Laravel Framework Certification – Coursera
 - WordPress Development Course – Coursera
